# Features and Applications

## Product Features

- Adopts a color LCD touch screen
- The outer shell is made of painted steel plate, which is corrosion-resistant, rust-proof, wear-resistant and scratch-resistant, while enhancing the appearance texture
- The transparent observation window is made of three-layer vacuum glass, equipped with an illuminating lamp and an electric defogging function, allowing a clear view of the interior of the test chamber.
- The inner chamber is made of 304 stainless steel plate, equipped with 2 stainless steel shelves with adjustable height.
- The inner chamber size can be customized; the standard configuration is 500mm750mm600mm (408L).
- Uses polyurethane rigid foam + glass wool as thermal insulation material.
- Temperature range: -40°C~+150°C; Humidity range: 20~98% R•H adjustable.
- Equipped with a built-in movable water tank and an automatic water supply pump, which can automatically transport water from the lower water tank to the upper layer.
- Automatic water shortage alarm.
- The bottom of the equipment is equipped with movable universal wheels for easy movement.
- The humidifier adopts a split-type humidifying cylinder design.
- Real-time display of temperature and humidity curves.
- Editable multi-stage temperature and humidity programs with multiple cycle segments.
- Power-off program memory function; after power recovery, you can choose to continue executing the program.
- Reservation start and shutdown functions to realize unattended operation.
- Key components adopt imported parts, such as France Tecumseh compressor.
- Equipped with various protection devices: overpressure protection, overload and overcurrent protection, heating dry-burning protection, phase failure protection, water tank water shortage protection, etc.
- USB interface for data export
- Design meets the following standards: GB11158, GB10589-89, GB10592-89, GB/T10586-89, GB/T2423.1, GB/T2423.2, GB/T2423.3, GB/T2423.4, GB/T2423.22, IEC60068-2-1, IEC60068-2-2, GJB150.3, GJB150.4, GJB150.9.

## Features and Applications

### Product Application

- Electronic and electrical industry
- Used to test the working status of electronic components (chips, capacitors, resistors) and complete equipment (mobile phones, computers, home appliances) under high and low temperature, high humidity environments, verify their moisture-proof, heat-resistant and cold-resistant performance, and avoid problems such as short circuits, aging and performance degradation of products in actual use.
- Automobile industry
- Simulates working conditions such as high-temperature exposure, low-temperature cold, humid and rainy weather to ensure that components do not fail under complex environments. For example, testing the wear resistance of automobile tires under high temperature and high humidity, and the high and low temperature charging and discharging performance of battery packs.
- Textile and leather industry
- Tests the color fastness, tensile deformation and mildew of textiles and leather products under different temperature and humidity conditions, judges the weather resistance of products, and guides the optimization of production processes.

# Product Details

- The test inner chamber is made of SUS#304 stainless steel
- Equipped with two shelves with adjustable height

- A water filling port is set at the bottom of the equipment with a moderate height for easy water filling. The built-in automatic water supply pump can transport water from the lower water tank to the upper layer
- A prominent water level line is set to judge whether the equipment needs water filling

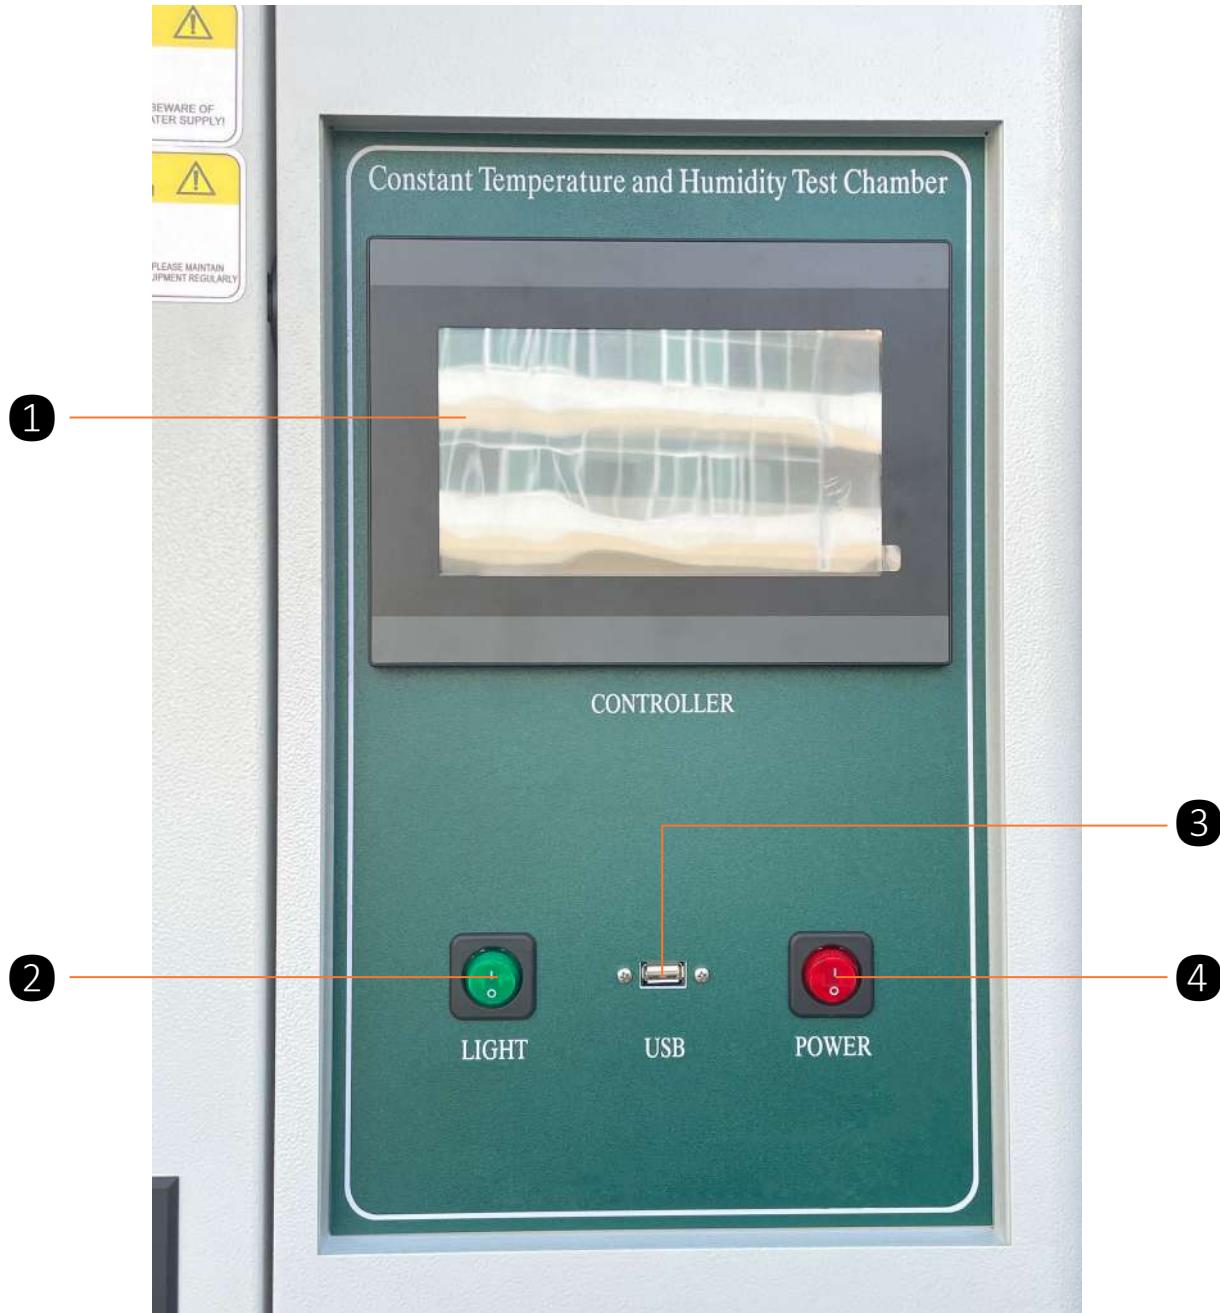

- Adopts imported France Tecumseh compressor

# Instrument Appearance

**1. Operation Panel    2. Illuminating Lamp    3. Transparent Observation Window**  
**4. Door Lock    5. Water Filling Port    6. Water Level Line    7. Movable Casters**

# Instrument Appearance

**1. Touch Screen Controller**

**4. Power Switch**

**2. Illuminating Lamp Switch**

**3. Usb Interface**

# Operation Interface

## Main Interface

1. Product Model

4. Setting Menu

7. Fault Record

2. Fixed-Value Test

5. Time And Date

8. Version Number

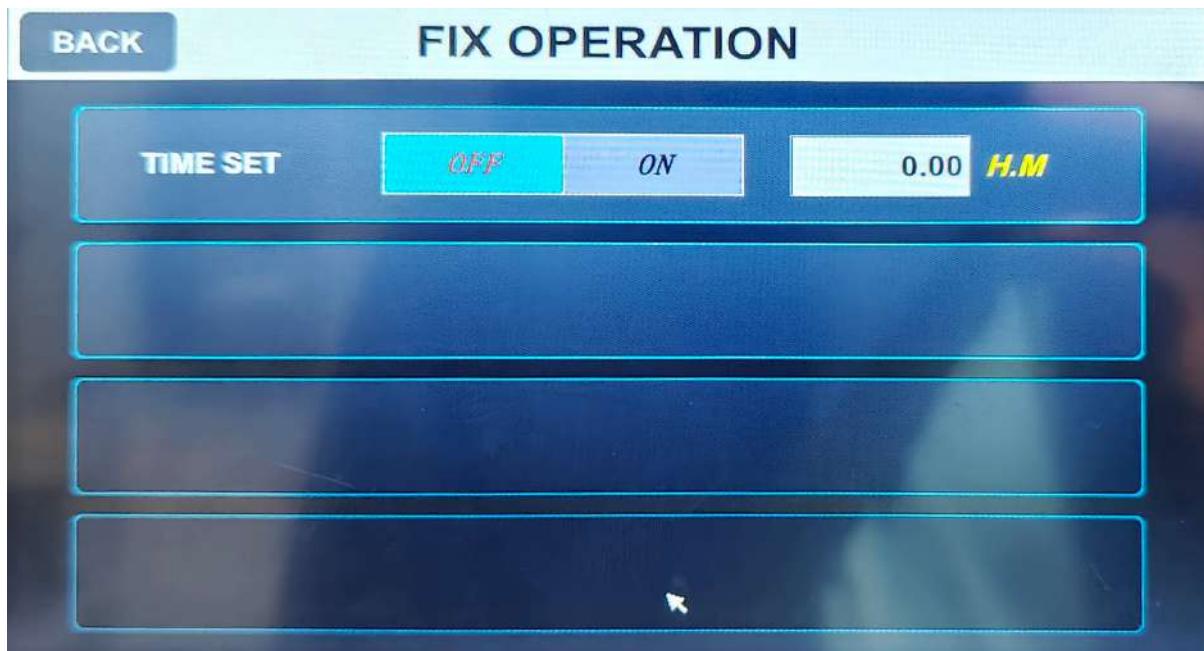

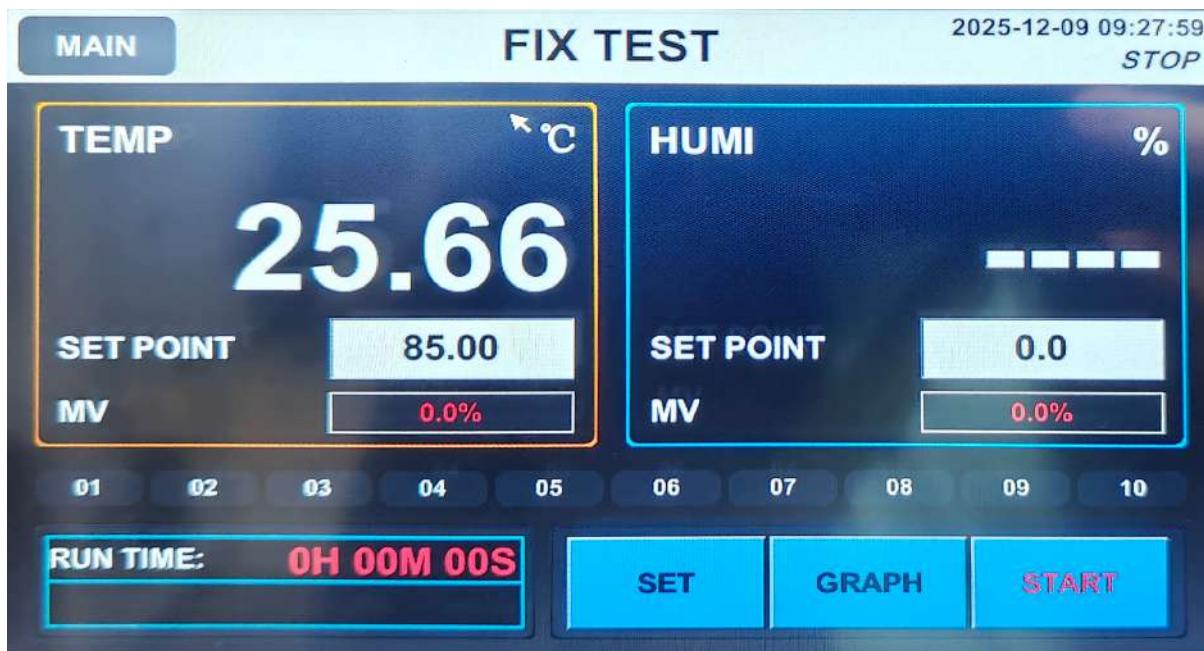

3. Program Test

6. Reservation Setting

9. Serial Number

## Operation Interface

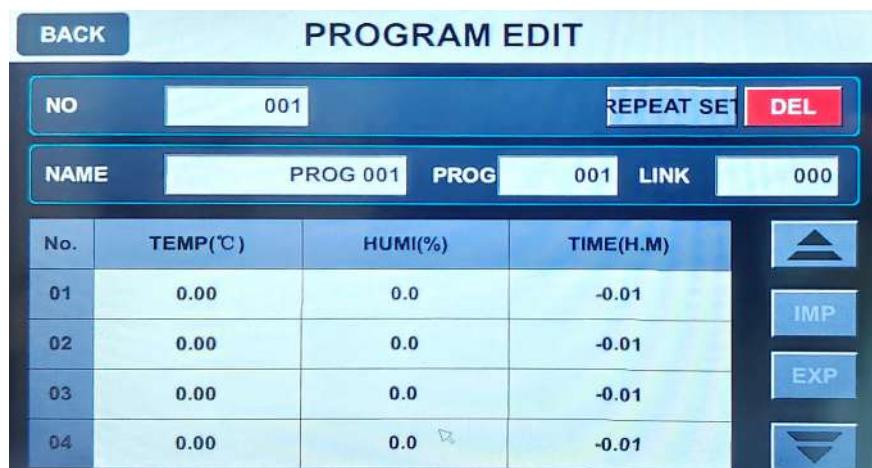

### Fixed-Value Test

- Set a fixed temperature and humidity parameter, which will not change after reaching the set value.
- When the timing shutdown function is turned off, the test will run continuously; when turned on, the running time can be input, and the test will automatically stop when the running time is reached.

# Operation Interface

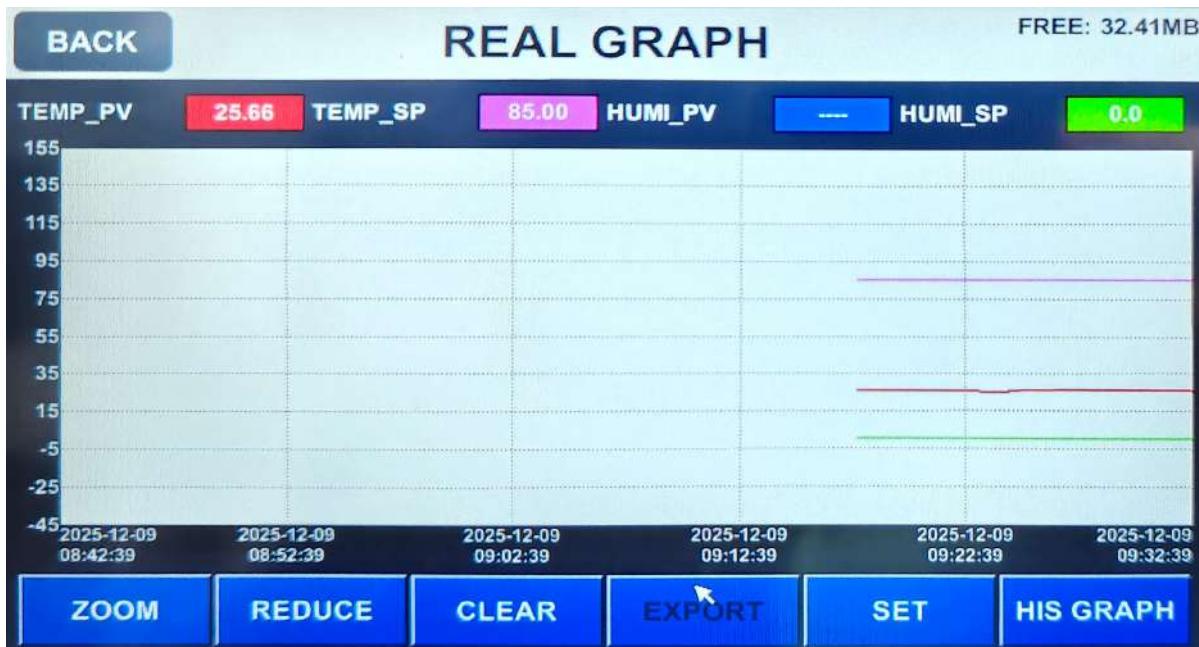

## Program Test

- Multiple segments of temperature and humidity parameters can be set, and the temperature and humidity parameters can be changed in each segment.
- Up to 120 groups of programs, each command can be executed repeatedly 999 times.

# Operation Interface

## Real-Time Curve

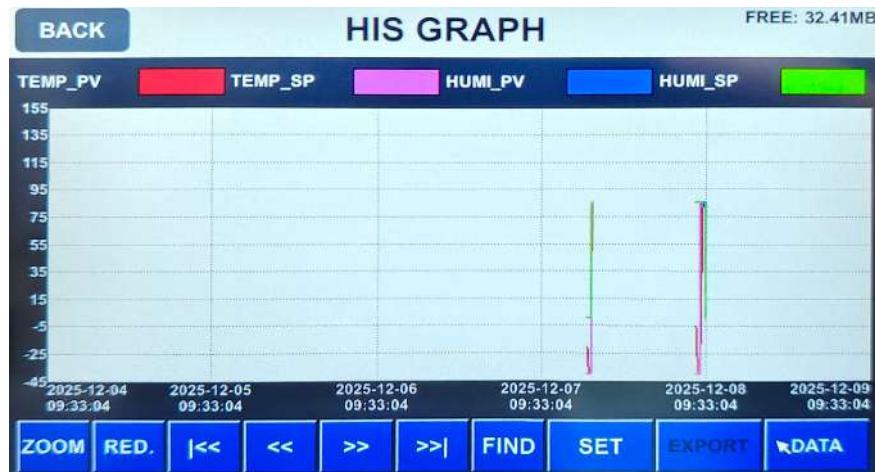

- Can generate real-time curves, including temperature measured value, temperature set value, humidity measured value and humidity set value. Each value is displayed in a different color for easy distinction.
- Can zoom in and zoom out the curve screen.
- Insert a USB flash drive to export curve data in Excel format.

Can set the scale range of the curve and the sampling time cycle of the data (unit: s).

# Operation Interface

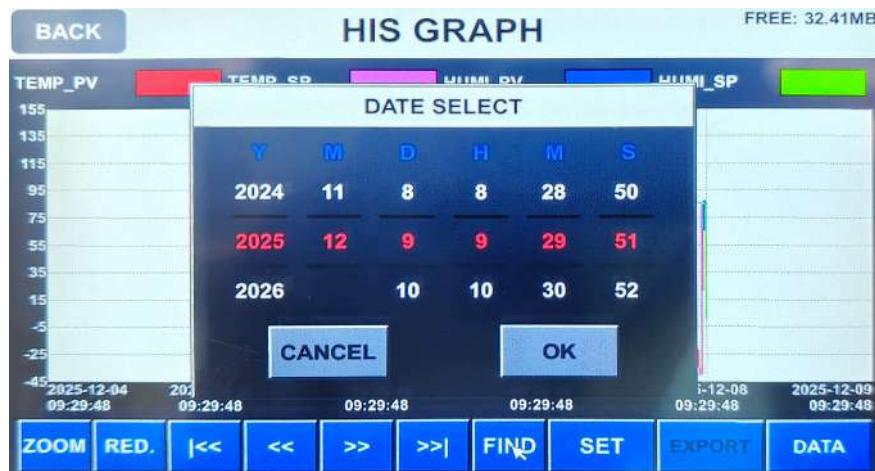

## History Curve

BACK HISTORY GRAPH DATA FREE: 32.41MB

No.	DATE	TIME	TEMP_PV	TEMP_SP	HUMI_PV	HUMI_SP	TOTAL: 240
1	2025-12-08	09:30:57	81.87	85.00	----	0.0	
2	2025-12-08	09:29:57	80.19	85.00	----	0.0	
3	2025-12-08	09:28:57	82.21	85.00	----	0.0	
4	2025-12-08	09:27:57	85.00	85.00	----	0.0	
5	2025-12-08	09:26:57	85.01	85.00	----	0.0

7	2025-12-08	09:24:57	85.01	85.00	85.1	85.0	
8	2025-12-08	09:23:57	85.01	85.00	85.1	85.0	
9	2025-12-08	09:22:57	85.01	85.00	85.1	85.0	
10	2025-12-08	09:21:57	85.01	85.00	85.1	85.0	

FIND DEL EXP

- Supports viewing history curves, which can also be exported via USB flash drive.
- In addition to curves, historical data can also be displayed, and the function of searching data by date is supported.

# Operation Interface

# Fault Record

MAIN	ALARM HISTORY			NEXT
No.	ALARM NAME	START TIME	END TIME	TOTAL: 0
1				
2				
3				
4				
5				
6				
7				
8				
9				
10				

- Supports viewing the equipment alarm history record, including start time and end time. Fault records can be exported.

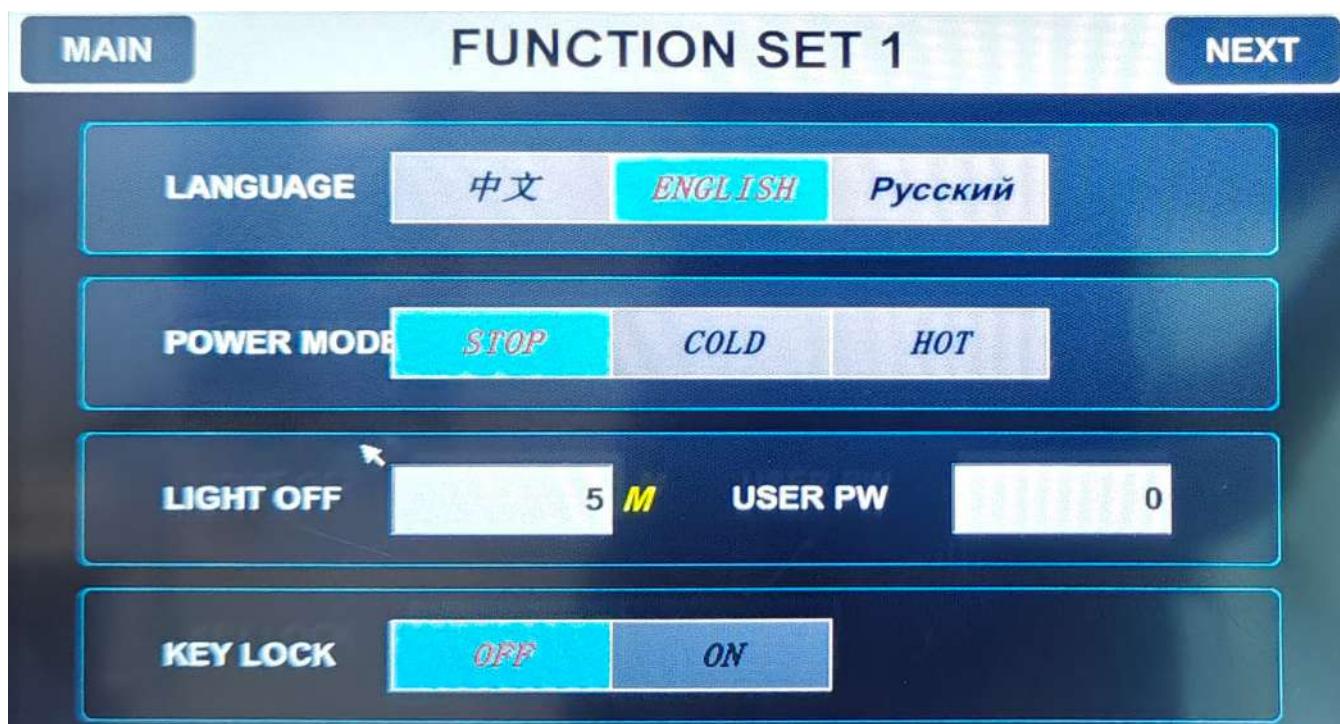

## Reservation Setting

<b>MAIN</b>	<b>RESERVE</b>		
<b>SYSTEM TIME</b>	2025 <b>Y</b>	12 <b>M</b>	09 <b>D</b>
	09 <b>H</b>	34 <b>M</b>	08 <b>S</b>
<b>RESERVE TIME</b>	2022 <b>Y</b>	01 <b>M</b>	01 <b>D</b>
	00 <b>H</b>	00 <b>M</b>	00 <b>S</b>
<b>RESERVE MODE</b>	<b>OFF</b>	<b>ON</b>	

- This equipment supports the reservation setting function. After setting the reservation time, turn on the reservation setting switch, and the equipment will automatically run at the reserved time to realize unattended operation.

# Operation Interface

## Settings

- Language selection: supports Chinese and English; other languages can be customized.
- Set the startup mode after power recovery:
  - Stop: The operation stops after power recovery.
  - Cold start: Restart the operation after power recovery.
  - Hot start: Continue the operation before power failure after power recovery.
- Screen backlight time setting: set to 0 to never turn off.
- Key lock function: after opening, the setting of all parameters is unavailable.

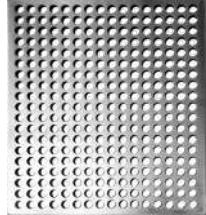

# Technical Specification

<b>Name</b>	Programmable Temperature And Humidity Test Chamber			
<b>Model</b>	THT-80	THT-225	THT-408	THT-1000
<b>Inner Chamber Volume</b>	80L	225L	408L	1000L
<b>Inner Chamber Size W*H*D (mm)</b>	400*500*400	500*750*600	600*850*800	1000*1000*1000
<b>Outer Chamber Size W*H*D (mm)</b>	930*1450 *950	1070*1610 *1170	1170*1710 *1270	1550*1650 *1470
<b>Temperature and Humidity Control Range</b>	Temperature: -40°C~150°C/-70°C~150°C Humidity: 20%~98%RH (other temperature and humidity specifications can be customized)			
<b>Temperature and Humidity Fluctuation</b>	$\pm 0.5^{\circ}\text{C}$ ; $\pm 2.5\%$ RH			
<b>Temperature and Humidity Deviation</b>	Temperature: $\pm 0.5^{\circ}\text{C}$ ~ $\pm 2^{\circ}\text{C}$ ; Humidity: $\pm 3\%$ RH ( $>75\%$ RH) $\pm 5\%$ RH ( $\leq 75\%$ RH)			
<b>Temperature and Humidity Uniformity</b>	$\leq 2^{\circ}\text{C}$ ; $\pm 3\%$ RH			
<b>Heating Rate</b>	About 3°C/min (non-linear, no load)			
<b>Cooling Rate</b>	Average 1°C/min (non-linear, no load)			
<b>Controller Resolution</b>	$\pm 03^{\circ}\text{C}$ ; $\pm 2.5\%$ RH			
<b>Inner Wall Material</b>	SUS304# stainless steel plate			

# Technical Specification

<b>Outer Shell Material</b>	Cold-rolled steel plate with paint baking
<b>Thermal Insulation Material</b>	High-temperature resistant high-density polyurethane foam insulation material
<b>System Air Circulation Mode</b>	Centrifugal fan - wide-band forced air circulation (top-out and bottom-in)
<b>Refrigeration Mode</b>	Mechanical compression refrigeration
<b>Refrigerator</b>	Hermetic piston-type France Tecumseh compressor or American Emerson scroll compressor
<b>Refrigerant</b>	R404A American Honeywell environmental protection refrigerant (R23+R404)
<b>Condensation Mode</b>	Air-cooled
<b>Heater</b>	Nickel-chromium alloy heating wire heater
<b>Humidifier</b>	Semi-hermetic steam humidification
<b>Water Supply Mode</b>	Automatic circulating water supply
<b>Safety Devices</b>	No-fuse switch, (compressor overload, refrigerant high and low pressure, over-humidity and over-temperature) protection switch, fuse fault warning system
<b>Power Supply</b>	220V AC ±10% 50Hz or 380V AC ±10% 50Hz
